Classroom Configuration

U-Shaped Configuration

Features

Folding leg	•	•	•
Fixed leg	•	•	•
8-wire/4-circuit power option	•	•	•
Data/communication option	•	•	•
Folding wire trough assembly	•	•	•
Rectangular worksurfaces	•	•	•
Wedge shaped worksurfaces for radiused configurations	•	•	•
"Laid-in" wiring	•	•	•
Door for leg wireway	•	•	•
Metal separation of power and data wires	•	•	•
Ganging	•	•	•
Modular data connection option (Versa®Cable)	•	•	•
Five edge styles	•	•	•

Power Distribution Unit (Rigid Wireway)

Dual Channel Leg Wireway (Laid-in Wiring)

Wire Manager Door

Folding Wire Trough Assembly with Folding Leg Table

Ganger

PowerUp® Module

Connect™Module

SPECIFICATIONS

Worksurfaces (Fixed & Folding)
Worksurface tops are 1-1/4" nominal overall thickness with .042" thick high-pressure laminate and .045 thick backer. Density is 45 lbs/ft³, M3 grade.

Edge Style
There are 5 choices of edge styles available: PVC (74P); Flat Vinyl T-edge (BN); Urethane (ME); Postformed (PL); and 3/8" Wood Band Edge (34S). The BN and PL edges are not available on wedge worksurfaces. 34S edge is standard in Natural Red Oak.

Folding Base Worksurfaces
Worksurfaces for folding base tables have a solid 45 lb/ft³ particleboard core construction. PowerUp® Module, Connect™or grommet locations are available along the back edge of the worksurface, away from the user in either the right- or left-hand corners or both locations. Two nylon carrying handles are built into the bottom of the worksurface along the front edge. The folded legs are held in place by two retractable nylon leg locks that are recessed into the bottom of the worksurface. The 48" short fold table has one leg lock and a velcro strap to hold the short fold leg.

Fixed Base Worksurfaces
Worksurfaces for fixed base tables have a solid 45 lb/ft³ particleboard core construction. PowerUp® Module, Connect™or grommet locations will be available along the back edge of the worksurface away from the user in either the right- or left-hand corners, both corners or center.

Wedge Worksurfaces
Wedge worksurfaces have a solid particleboard core construction. PowerUp® Module, Connect™or grommet locations are not available. The wedge is supported between two tables by four 1-1/2" x 3/4" rectangular metal splice tubes. Four nylon gangers are also used to draw the wedge up to each table and keep the splice tubes from disengaging.

Leg Assemblies (Fixed & Folding)
The leg assembly is made up of a 24" or 30" foot, leg upright with access door, and either a fixed or folding leg. The feet and the cantilevers are die cast aluminum and the leg and access door are extruded aluminum. The feet each have two nylon glides that attach to the foot via 5/16" diameter x 7/8" long threaded studs. The leg contains a 1" x 2-1/2" wireway that directs wires from the foot into the horizontal wire manager. The leg wireway is divided into two halves that keep data cables separate from electrical cables. The leg wireway also has an aluminum access door that hinges on two steel dowel pins and snaps shut via a nylon snap. The cantilever attaches the leg assembly to the worksurface via raised bosses that provide 3/4" of clearance between the cantilever and the bottom of the worksurface, allowing a space to pass cables from table to table. The raised bosses on the cantilever also serve as mounting studs for the nylon table gangers that hold tables/wedges together. Each table has one right leg and one left leg assembly. The leg assemblies are available in three standard heights: 27", 29" & 32". The leg assemblies are held together by two 1/4" diameter draw bolts that clamp the assembly together. The legs are available in standard powder coat finishes. Fixed leg tables ship KD. Folding leg tables ship assembled.

Folding Leg Assembly
The folding leg assembly is only available on 60" and 72" wide tables. A short fold option (one leg folds over the top of the other) is available on the 48" wide table. The table unfolds by releasing the legs from the nylon leg locks and raising the legs. Once the legs are in a vertical position, snaps in the cantilever hold them upright. The spring loaded catch, located on each end of the wire trough assembly, releases and rotates out of its stored position up between the legs until the catches snap into the receivers on the legs. The table can be turned over and stood on its legs.

DataLink® Training Table System

General Information

Laptop Garage®

Features

Inside usable laptop area	•
Standard size	17.5"x13.75"x2.25"
Large size	19.5"x13.75"x2.25"

Folding Tables With Casters
Casters are available for all tables. When casters are ordered for a 60" wide table, the 29" and 32" height table becomes a short-fold table.

TECHNICAL SPECIFICATIONS

Garage Construction
The two-piece Laptop Garage® enclosure and shelf shall be fabricated from 16-gauge steel and have a black powder-coated finish. The door shall be constructed from 5/8" thick MDF board and be covered with .040" thick high-pressure laminate on both sides. The edges shall painted black. The door when opened by pressing a steel latch and catch assembly shall automatically rise by the force stored in two gas cylinders. These cylinders shall also provide the variable length linkage used to raise the pivot rod which shall activate dual scissors mechanisms hidden beneath a shelf. Each scissors mechanism shall be made from two 14-gauge x 5/8" wide straps, which are punched to accept plastic wear bushings. Upon reaching the maximum open position the cover shall automatically be fixed in that position by an 11-gauge steel gravity-activated lock bracket. The unit shall allow access to the underside of the shelf if necessary due to the spillage of liquid or for cleaning or retrieval of a lost item in this position only. This shall be accomplished by lifting the shelf. Two sizes of garages are available - Standard and Large.

Optional Lock Mechanism
Locking units shall be equipped with an 110/120v keyless operated solenoid. The solenoid shall allow the locking sequence to begin with the unit's cover in any position. Locks shall be programmable to lock and unlock all units within a room at the same time, or individually. Keyless remotes are included.

Note
Laptop Garages must be specified and ordered as part of an InTandem®, PowerComm®, or DataLink® table. They cannot be ordered as a separate unit.

ADA Requirements
27", 29", and 30" high tables with Laptop Garages do NOT meed ADA requirements. Must specify wheelchair kit or 32" high legs.

INFORMATION

Warranty
See terms for general information.

UL and C-UL Listing
The DataLink Training Table System is Listed to applicable US and Canadian safety standards and requirements by Underwriters Laboratories, Inc. Two of the US Standards used to evaluate DataLink are UL 1286, Office Furnishings and UL 723, Standard for Test for Surface Burning Characteristics of Building Materials. The Canadian Standard used to evaluate DataLink is CSA Standard C22.2 No. 203, Modular Wiring Systems for Office Furniture.

Flammability
UL 723 is equivalent to ASTM E84 and NFPA Life Safety Code 255. These requirements have been adopted by the Federal and many State and Local Governments.

DataLink® Training Table System

Electrical Specifications

SPECIFICATIONS

Wire Manager Door and Modesty Panel

The wire manager door and modesty panel run the full length of the table, between the leg assemblies, along the back edge of the table. The wire manager door is a hollow PVC extrusion with ABS end caps. The wire manager door is monochromatic with the leg if the leg is black, blue grey, sand or warm grey. All other leg colors will come with a black wire manager door. The wire manager door snaps onto the .88 diameter extruded aluminum cross tube across its entire length, forming a pivoting joint. This allows the wire manager door to rotate open and shut. The modesty panel is made of 18-gauge sheet metal and attaches to the legs and worksurface providing support to the table and a mounting surface for electrical components.

Electrical

The DataLink® Table provides a "lay-in" wire chase for electrical wires. Electrical wires can be laid into the leg and wire manager by opening convenient hinged access doors. Electrical wires can be routed to adjacent tables by laying them into the space between the cantilever and the worksurface at the back of the table.

Data

The DataLink® Table provides a "lay in" wire chase for data cables. Data cables can be laid into the leg and wire manager by opening convenient hinged access doors. The terminated end of the data cable can be snapped into one of eight pre-punched cut outs in the sheet metal modesty panel. Data cables can be routed to adjacent tables by laying them into the space between the cantilever and the worksurface at the back of the table. Up to 16 CAT.5 data wires can be fed up a single leg (non-powered infeed leg). Data cables and jacks are provided by the customer.

PowerUp® Module

DataLink® Tables are available with one or two PowerUp® power modules. PowerUp® is a UL Listed, relocatable power tap, which mounts flush into the table top. When flipped up, (cover open), one duplex receptacle and two data ports are exposed.

The PowerUp® module is 7" long x 3-1/2" wide x 2-1/2" high and fits securely into a 6-1/4" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL-VO minimum requirements. The module has two receptacles, rated at 15 amps/125 volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. The data connectors are not supplied with the module and are purchased by the customer.

The module has a dampened spring-loaded mechanism allowing the unit to open for use and close when not in use. The power receptacles open above the plane of the worksurface to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of communication data. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. Powered tables are supplied with a 22" cord; non-powered tables are supplied with a 9'cord. All tables have a 3-prong plug.

PowerUp® is UL Listed (UL1363) as a Temporary Power Tap.

Connect™Single Circuit Electrical System

Connect™is a single-circuit 15 amp system which can power up to six laptops or three PC's. (This is only a general guideline. Always be sure to check the hardware's actual amperage rating.) The National Electrical Code (NEC) indicates that hardware operating under a continuous load - three or more hours of constant use - should not utilize more than 80% of its rated amperage, or 12 amps in the case of Connect. UL recognized component.

Connect's advantage is the simple way in which it accesses power from the building source and allows for quick worksurface reconfiguration. Since Connect™uses a standard 10 ft., 15 amp, three-prong plug with circuit breaker, there is no need for an electrician, as with 8-wire/4-circuit systems. Connect™is a simple "plug and play".

Connect™requires that the worksurface utilize a variant of PowerUp® in size and shape but has a manual open and close function instead of the dampened spring loaded mechanism on PowerUp®, and has a different cord termination. Instead of PowerUp®'s standard three-prong plug, there is a two-sided, bi-colored "T"-connector. Each side of the "T"-connector attaches to a cord, which terminates with a latched connection. The cord may be either the infeed or a jumper.

All jumper plugs and "T"-connections are keyed and color-coded to prevent misconnection.

A maximum of six Connect™modules (i.e., PowerUp® variants) are permitted. The jumpers between Connect™modules are available in three lengths: 29", 53", and 77", depending on table configuration.

PLEASE NOTE: Standard PowerUp® units, which the user may already have, are NOT usable with Connect. When specifying Connect, the PowerUp® version of Connect™is automatically sourced when the Connect™module/jumper or Connect™infeed is ordered.

The Connect™module/jumper is available in black only.

To reduce the risk of electric shock, use only indoors.

DataLink® Training Table System

Fixed Leg Tables

DLFX

Fixed Leg Table, 24"D

- Available with or without an 8-wire/4-circuit power distribution unit ("Power Option")
- Duplex receptacles, infeeds, and jumpers for the "Power Option" must be ordered separately
- Wire trough assembly is standard on all tables
- Data ports located in the modesty panel are standard. Data jacks are supplied by the customer
- Includes ganger
- Connect™not available on Powered Tables
- See Connect™Single Circuit Electrical System to order modules

INFORMATION

Wood Color Variations
High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

INFORMATION

Wood Color Variations
High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

INFORMATION

Wood Color Variations
High quality wood table edges and surfaces are characterized by distinctive natural colors and grain patterns. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

SPECIFICATIONS

Worksurfaces
Horizontal worksurfaces are constructed of 1-1/8" thick 45# density particleboard with .030 thick high-pressure laminate and .030 thick high-pressure backing sheet. Overall thickness is 1-1/4" .

Front edge is postformed with an eliptical shape. Rear edge and two sides are covered with matching flat .024" PVC edge banding. Urethane edge worksurfaces have an eliptical front edge and remaining edges are 1/4" molded urethane.

Grommets are standard 5-3/4" x 2-1/4" and have a flip-up receding door. Grommets are the same size as PowerUp® modules to allow for retrofitting.

Dual-Door Beam
Lay-in access to data cables from the back side of the desk. Access to power and data cables is also available from the front. Beam doors are constructed of .06" thick dual durometer PVC extrusion and pivot at the bottom.

Electrical trough is constructed of 16-gauge formed steel. Openings on the back have a 16-gauge steel removable outlet cover. With hard-wire power, the top raceway is covered by a 20-gauge formed steel cover with holes for simplex receptacles. Wiring and connections are supplied by the electrician.

Data trough is constructed of 16-gauge steel. Terminated end of data cables snap into pre-punched holes in the data trough. Multiple data plates also snap into the data trough. The customer provides data jacks and data plates. An optional data cover can be specified to cover the data trough. Data cover is constructed of 24-gauge steel. Standard ABS plastic beam end caps enclose the wires on end-of-run and stand-alone beams. Middle and corner middle beam assemblies do not include end caps.

Legs
All legs have vertical wire management capabilities. A reversible vertical wireway is standard on each leg. Steel trim with liquid-tight fittings are available for power infeeds at the bottom of any leg. All legs can be retrofitted in the field. All "C" legs can be used as either end legs or shared legs. "C" legs are used when connecting tables in a row. Vertical leg tube is 2" x 5", 14-gauge formed steel. Nylon glide under toe casting can be adjusted vertically 1-1/4".

Corner Worksurface Support Leg
Square-shaped leg for transitional corner surface is 2" x 2", 14-gauge steel. One leg is required per worksurface. Wire management is not available on this leg.

Freestanding Frames with Casters
Available on 30" depth worksurfaces only. Model number includes a stand-alone beam with right and left end caps, two "C" legs and four 2-3/4" diameter dual wheel locking, black, carpet casters. The stand-alone beam is not available with 8-Wire, hard-wire, communications outlets or data raceway covers. An optional surge protected six-outlet, 110 volt electrical strip with a six foot cord is available to lay in the beam. Freestanding frames with casters are not UL listed.

PowerUp®
PowerUp® is a UL Listed, relocatable power tap, which mounts flush into the table top. When flipped up, (cover open), one duplex receptacle and two data ports are exposed. PowerUp® is UL Listed (UL1363) as a Temporary Power Tap.

The PowerUp® module is 7" long x 3-1/2" wide x 2-1/2" high and fits securely into a 6-1/4" x 3" cutout, still allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL-VO minimum requirements. The module has two receptacles, rated at 15 Amps/125 Volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most man-

ufacturers. The data connectors are not supplied with the module and are purchased by the customer.

The module has a dampened spring-loaded mechanism allowing the unit to open for use and close when not in use. The power receptacles open above the plane of the worksurface to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of data communication. Data ports are molded to accept RJ45 jacks, but can be modified to accept various brands of jacks. The module comes standard with either a 22", 108", or 180" cord and 3-prong plug.

8-Wire Pre-wired Harness
UL listed 8-Wire system consists of four conductors (12-gauge), two neutrals (10-gauge), and two grounds (12-gauge). System provides four 20 amp, 125 volt capacity circuits. All receptacles are rated at 15 amps, 125 volt capacity. Connection diagrams are available. Pre-wired harness plugs into the adjacent table harness for table reconfiguration.

8-Wire Harness - T-Shaped
8-Wire electrical harness of galvanized steel is available for T-shaped configurations. Available for 24", 30" deep worksurfaces.

8-Wire Harness - Back-To-Back
8-Wire electrical harness of galvanized steel is available for back-to-back configurations. Available for all width tables.

End-of-Run Beam - NY 8-Wire Infeed
The City of New York 8-Wire Infeed uses a power infeed table beam supplied with a service entry box. Box is 2.25 cubic inches for each of the 8 wires entering from source and leaving to pre-wired harness system. Includes steel trim plate with dual holes for electrical and data entry and six feet of liquid-tight flexible conduit .83 diameter.

Communications Circuitry
Data connectors and wiring must be ordered separately by the customer.

Privacy Screens
Standard 3/4" thick core material. Both sides are laminated with .030" thick high-pressure laminate as standard. All edges are banded with PVC edging. Available in three heights with a straight top edge.

Divider Screens
Standard 3/4" thick core material. Both sides are laminated with .030" thick high-pressure laminate as standard. All edges are banded with PVC edging. Available in three heights with a curved top. Dividers are available only in conjunction with privacy screens.

Wheelchair Accessible Kit
Made of 11-gauge steel. Designed for easy retrofit of existing InTandem® units. Available in widths of 36" through 72" and in 29" height to make the overall surface height 32". Standard to fit 30" deep worksurface and the support arms.

INFORMATION

Warranty
See terms for general information.

UL Listing
The InTandem Table System is Listed to applicable UL Standards and requirements by Underwriters Laboratories, Inc. Two of the Standards used to evaluate InTandem Table Units are UL 1286, Office Furnishings and UL 723, Standard for Test for Surface Burning Characteristics of Building Materials. The freestanding frames with casters are not included in the Listed System.

InTandem® Table System

General Information

Laptop Garage®

Features

Inside usable laptop area	•
Standard size	17.5”x13.75”x2.25
Large size	l9.5”x13.75”x2.25

TECHNICAL SPECIFICATIONS

Garage Construction
The two-piece Laptop Garage® enclosure and shelf shall be fabricated from 16-gauge steel and have a black powder-coated finish. The door shall be constructed from 5/8” thick MDF board and be covered with .040” thick high-pressure laminate on both sides. The edges shall painted black. The door when opened by pressing a steel latch and catch assembly shall automatically rise by the force stored in two gas cylinders. These cylinders shall also provide the variable length linkage used to raise the pivot rod which shall activate dual scissors mechanisms hidden beneath a shelf. Each scissors mechanism shall be made from two 14-gauge x 5/8” wide straps, which are punched to accept plastic wear bushings. Upon reaching the maximum open position the cover shall automatically be fixed in that position by an 11-gauge steel gravity-activated lock bracket. The unit shall allow access to the underside of the shelf if necessary due to the spillage of liquid or for cleaning or retrieval of a lost item in this position only. This shall be accomplished by lifting the shelf. Two sizes of garages are available - Standard and Large.

Optional Lock Mechanism
Locking units shall be equipped with an 110/120v keyless operated solenoid. The solenoid shall allow the locking sequence to begin with the unit’s cover in any position. Locks shall be programmable to lock and unlock all units within a room at the same time, or individually. Keyless remotes are included.

Note
Laptop Garages must be specified and ordered as part of an InTandem®, PowerComm®, or DataLink® table. They cannot be ordered as a separate unit.

ADA Requirements
27”, 29”, and 30” high tables with Laptop Garages do NOT meed ADA requirements. Must specify wheelchair kit or 32” high legs.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
• The absence of the ☐ indicates that no choice is required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

PL	= Postformed Laminate
ME	= Urethane Edge

Ⓒ Select top power feed.

L	= Left
R	= Right
N	= None

Ⓓ Select no. of PowerUp modules.

0	= No PowerUp module
1	= One PowerUp module; add $89
2	= Two PowerUp modules; add $177

Ⓔ Select surface finish.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.

Ⓕ Select trim color.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.
Trim includes grommet, PowerUp, and/or urethane edge color, if applicable.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
• The absence of the ☐ indicates that no choice is required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select surface finish.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
• The absence of the ☐ indicates that no choice is required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select surface finish.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

SPECIFICATIONS

Worksurfaces
Horizontal worksurfaces are constructed of 1-1/8” thick 45# density particleboard with .042” thick high-pressure laminate and .045” thick high-pressure backing sheet. Overall thickness is 1-1/4”.

The front edge is postformed with an elliptical shape. The rear edge and two sides are covered with a matching flat .024” PVC edge banding.

Beam Assembly
The beam consists of a one-piece aluminum extrusion divided into two raceways, each extending the entire length of the horizontal worksurface and separated from each other by an aluminum divider. When 8-wire power is ordered, the top raceway is covered by a 20-gauge formed steel cover with holes for duplex receptacles, enclosing the 110 volt wiring. When communications power is ordered, the bottom raceway is covered by a 20-gauge formed steel cover with a hole for a triplex modular faceplate, enclosing the communication circuitry. When hard wire is ordered, the top raceway is covered by a 20-gauge formed steel cover with holes for simplex receptacles (single), enclosing the 110 volt wiring. Beam door allows all cords to be stored along the side of beam and out of sight. Beams are mechanically aligned to adjoining beams with steel splice inserts.

Legs
All legs have vertical wire management capabilities. Both power and communications can be routed in the same leg. Grommets with brushes located at the bottom of each leg are standard. All legs can be retrofitted in the field to accomodate a power infeed. All “C” legs can be used as either an end leg or a shared leg. The vertical leg tube is 2”x4”, 14-gauge steel tubing. The nylon glide at the bottom of the toe casting can be adjusted vertically 1-3/8” with an allen wrench from the top of the toe casting. The end panel is standard 3/4” thick core construction. Both sides are laminated with .042” thick high-pressure laminate as standard and banded with PVC edging. Veneer end panels have flat .018” thick veneer strips.

Modesty Panel and Privacy Screens
Standard 3/4” thick core material. Both sides are laminated with .042” thick high-pressure laminate as standard. All edges are banded with PVC edging. Privacy screens have a curved top edge. Veneer edges have flat .018” thick veneer strips.

Dividers
Standard 3/4” thick core material. Both sides are laminated with .042” thick high-pressure laminate as standard. All edges are banded with PVC edging. Dividers have a curved top edge. Veneer edges have flat .018” thick veneer strips. Dividers are available only in conjunction with privacy screens.

4-Circuit Pre-wired Harness
The UL Listed 8-wire system provides four 20 amp, 125 volt capacity circuits. All receptacles are rated 15 amps, 125 volt capacity. Connection diagrams are available. The pre-wired harness is easily plugged into the harness of the adjacent table allowing reconfiguration of the tables without rewiring or the need to thread connectors through legs.

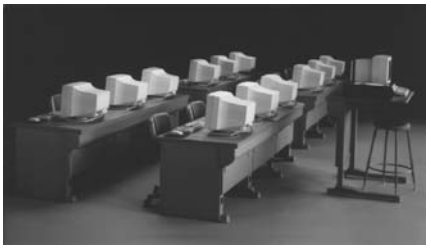
Communication Circuitry
A triplex modular faceplate is provided when the communications option is ordered. Communications wiring is completed in the field by the customer.

PowerUp® Module
PowerUp® is a UL Listed (UL1363), temporary, relocatable power tap, which mounts flush into the table top. When flipped up, (cover open), one duplex receptacle and two data ports are exposed.

The PowerUp® module is 7” long x 3-1/2” wide x 2-1/2” high and fits securely into a 6-1/4” x 3” cutout, allowing removal without tools. The module is constructed of polycarbonate with a textured finish, meeting UL-VO

PowerComm® Table System

General Information



Features

Rectangular worksurface	•	•
Corner worksurface		
End-of-run beam assembly		•

minimum requirements. The module has two receptacles, rated at 15 amps/125 volts and two locations for data connectors. Snap-in data plates hold data connectors and allow the standard module to accommodate most manufacturers. the data connectors are not supplied with the module and are purchased by the customer.

The module has a dampened spring-loaded mechanism allowing the unit to open for use and close when not in use. The power receptacles open above the plane of the worksurface to avoid accidental spills into the receptacle. Data jacks remain stationary to avoid excess wear and tear on the wire connections and promote transmission of communication data. Data ports are molded to accept RJ-45 jacks. The module can be modified to accept various brands of jacks. The module comes standard with either a 22”, 108”, or 180”, cord and 3-prong plug.

CPU Sling

The CPU Sling straps have positive locking strap clamps that keep the CPU firmly in place. The CPU Sling mounts below the worksurface and provides 5-1/2” of travel and 359° swivel for ease of accessibility. Front and rear bumpers prevent over-travel. The CPU Sling is available in black finish only. The maximum weight capacity is 75 pounds and accomodates CPUs with maximum circumference of 65”.

Wheelchair Accessible Kit

Designed for easy retrofit of existing PowerComm® stations. Available in widths of 36” through 72”. The wheelchair kit is available in two heights of 27” and 29” legs to make overall surface height 32”. The wheelchair kit comes standard to fit both the 30” and 36” deep worksurface and the support arms.

Freestanding Frames with Casters

Freestanding Frames with Casters are standard 30” depth worksurfaces. Height is 29” or 38” including caster height. Model number consists of stand alone beam with right or left end caps, two (2) end “C” legs and four (4) 2-3/4” diameter dual wheel locking carpet casters. The stand alone beam is not available with 8-wire or hardwire outlets or communications and data raceway cover. An optional surge protected six outlet, 110 volt electrical strip with 6’ long cord is available to lay in beam. Plastic beam door is included to accomplish cord management. (Freestanding frames with casters are not UL listed.)

8-Wire Harness for T-Shaped

8-wire electrcial harness is available for 24”, 30” and 36” deep worksurfaces when T-shaped table configurations are required.

8-Wire Harness for Back-To-Back

8-wire electrical harness is available for use in back-to-back configurations. Harnesses are available for all width tables. An optional solid outlet plate of 20-gauge steel is available to cover exposed holes in beams.

INFORMATION

Warranty

See terms for general information.

UL Listing

The PowerComm System is Listed to applicable UL Standards and requirements by Underwriters Laboratories, Inc. Two of the Standards used to evaluate PowerComm are UL 1286, Office Furnishings and UL 723, Standard for Test for Surface Burning Characteristics of Building Materials. The freestanding frames with casters are not included in the Listed System.

PowerComm® Table System

General Information

Laptop Garage®

Features

Inside usable laptop area	•
Standard size	17.5"x13.75"x2.25"
Large size	19.5"x13.75"x2.25"

TECHNICAL SPECIFICATIONS

Garage Construction
The two-piece Laptop Garage® enclosure and shelf shall be fabricated from 16-gauge steel and have a black powder-coated finish. The door shall be constructed from 5/8" thick MDF board and be covered with .040" thick high-pressure laminate on both sides. The edges shall painted black. The door when opened by pressing a steel latch and catch assembly shall automatically rise by the force stored in two gas cylinders. These cylinders shall also provide the variable length linkage used to raise the pivot rod which shall activate dual scissors mechanisms hidden beneath a shelf. Each scissors mechanism shall be made from two 14-gauge x 5/8" wide straps, which are punched to accept plastic wear bushings. Upon reaching the maximum open position the cover shall automatically be fixed in that position by an 11-gauge steel gravity-activated lock bracket. The unit shall allow access to the underside of the shelf if necessary due to the spillage of liquid or for cleaning or retrieval of a lost item in this position only. This shall be accomplished by lifting the shelf. Two sizes of garages are available - Standard and Large.

Optional Lock Mechanism
Locking units shall be equipped with an 110/120v keyless operated solenoid. The solenoid shall allow the locking sequence to begin with the unit's cover in any position. Locks shall be programmable to lock and unlock all units within a room at the same time, or individually. Keyless remotes are included.

Note
Laptop Garages must be specified and ordered as part of an InTandem®, PowerComm®, or DataLink® table. They cannot be ordered as a separate unit.

ADA Requirements
27", 29", and 30" high tables with Laptop Garages do NOT meed ADA requirements. Must specify wheelchair kit or 32" high legs.

INFORMATION

Warranty
See terms for general information.

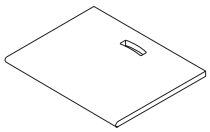
Worksurfaces



PCWS

Rectangular Worksurface

- 1-1/4" solid core top with plastic laminate surface
- Postformed plastic laminate edge, wood bullnose edge on plastic laminate surface or veneer with wood edge.
- 1-1/2" x 6" grommet with brush for wire management, one grommet on 24-54" surfaces, two grommets on 60", 66" and 72" surfaces
- Edges on sides and rear are covered with matching flat .024" PVC edge banding
- Each worksurface utilizes threaded steel inserts to facilitate the attachment of legs to the worksurface
- 60", 66" and 72" surfaces are predrilled with steel inserts to accommodate a middle divider

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
• The absence of the ☐ indicates that no choice is required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

PL	= Postformed Edge
WL	= Wood Edge Laminate
WV	= Wood Edge/Veneer

Ⓒ Select top power feed location.

L	= Left
N	= None
R	= Right

Ⓓ Select grommet with brush color.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.

Ⓔ Select surface finish.
Select laminate or veneer surface.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.
Laminate finishes are only available on postformed edge laminate (PL) and wood edge laminate (WL) worksurfaces. The veneer and edge finishes are only available on wood edge veneer (WV) style worksurfaces.

Ⓕ Select wood edge color.
Only available on WL edge styles.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.

INFORMATION

Wood Veneer
Composite veneer utilizes selected hardwood. Veneers are completely penetrated with dye in a computer controlled operation to ensure consistency of color. Veneers are manufactured to ensure grain consistency.

Wood Edges
Reconstituted solid red oak front edge is applied with PVA adhesive under pressure until cured. Edge is stained and finished with a three step low gloss catalyzed conversion varnish. The wood edge is elliptically shaped to match the laminate postformed elliptical edge.

Wood Color Variations
High quality wood table edges and surfaces are characterized by distinctive natural colors and grain colors. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
• The absence of the ☐ indicates that no choice is required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select edge style.

PL	= Postformed Edge
WL	= Wood Edge Laminate
WV	= Wood Edge/Veneer

Ⓒ Select top power feed location.

L	= Left
N	= None

Available on Square/Transitional Corner Worksurface.

Ⓓ Select grommet with brush color.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.

Ⓔ Select surface finish.
Select laminate or veneer surface.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.
Laminate finishes are only available on postformed edge laminate (PL) and wood edge laminate (WL) worksurfaces. The veneer and edge finishes are only available on wood edge veneer (WV) style worksurfaces.

Ⓕ Select wood edge color.
Only available on WL edge styles.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.

INFORMATION

Wood Veneer
Composite veneer utilizes selected hardwood. Veneers are completely penetrated with dye in a computer controlled operation to ensure consistency of color. Veneers are manufactured to ensure grain consistency.

Wood Edges
Reconstituted solid red oak front edge is applied with PVA adhesive under pressure until cured. Edge is stained and finished with a three step low gloss catalyzed conversion varnish. The wood edge is elliptically shaped to match the laminate postformed elliptical edge.

Wood Color Variations
High quality wood table edges and surfaces are characterized by distinctive natural colors and grain colors. Due to natural variations of fine wood, it is impossible to exactly match colors and grains with consistency.

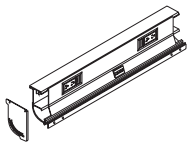
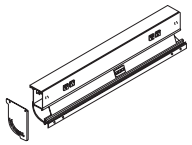
End-of-Run Beam Assembly

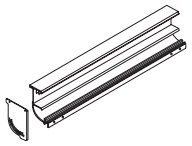


PCE

End-of-Run Beam Assembly (8C)
- 8-wire power
- Communication faceplate
- Beam end cap supplied
- Duplex receptacles not included in beam. See Electrical section for ordering information
- Internal components of 60", 66" and 72" beams come in two sets



End-of-Run Beam Assembly (HC)
- Hard-wire power
- Communication faceplate
- Beam end cap supplied
- Includes simplex receptacles



End-of-Run Beam Assembly (NN)
- No power
- No communication faceplate
- Beam end cap supplied

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select panel finish.

FL	= Laminate
FV	= Veneer

Ⓒ Select trim color.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.

Ⓓ Select surface finish.
Select laminate or veneer surface.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.
Laminate finishes are only available on laminate (FL) panel finish. The veneer finishes are only available on veneer (FV) panel finish..

INFORMATION

Veneer Edges
All four edges on privacy screens, dividers and modesty panels are flat .018 thick veneer strips.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.
• The absence of the ☐ indicates that no choice is required.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.

Ⓑ Select position of screen.

L	= Left
M	= Middle
R	= Right

Ⓒ Select screen finish.

FL	= Laminate
FV	= Veneer

Ⓓ Select trim color.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder.

Ⓔ Select surface finish.
Select laminate or veneer surface.
Refer to color addendum at ki.com or in KI Price List or KI Fabrics & Finishes binder. Surface finish offerings are based on edge style selections.
Laminate finishes are only available on laminate (FL) panel finish. The veneer finishes are only available on veneer (FV) panel finish..

INFORMATION

Veneer Edges
All four edges on privacy screens, dividers and modesty panels are flat .018" thick veneer strips.

Position of Privacy Screen
Left-hand screen has pilot holes for brackets on the right side and none on the left.

Right-hand screen has pilot holes for brackets on the left side and none on the right.

Middle screen has pilot holes for brackets on both ends.

FINISH INFORMATION

Additional Laminate Offering
Additional laminates beyond KI standard offering, are available with two weeks extended leadtime. To specify additional laminates, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.
Note: Nonstandard laminates from these suppliers (example: textured laminates), require an upcharge and additional leadtime. Contact KI.

Laminate finishes are only available on laminate (FL) panel finish. The veneer finishes are only available on veneer (FV) panel finish..

INFORMATION

Note:
Divider size specified according to depth of worksurface

If dividers are to be used in conjunction with wheelchair kits, call KI Systems Department for specification details.

Veneer Edges
All four edges on privacy screens, dividers and modesty panels are flat .018" thick veneer strips.

Position of Divider Screen
Left-hand divider screen is positioned on the left end of a row of tables.

Right-hand divider screen is positioned on the right end of a row of tables.

Middle divider refers to every divider which is not located on an end.

You make the rules.
We make the rest.®

Of course KI solutions work better for you. They're made for you. No one pays more attention to customer needs than we do. We don't design our furniture to win awards (even though it does). We don't rely on one-size-fits-all solutions (even though they would make our life easier). We find out what the market needs. And, we make it. The same applies to our service, distribution…everything we do. KI solutions work, because we're working for you.
