SPECIFICATIONS

Torsion® Seat

Seat and Backrest

Seats and backrests are molded compound curved polypropylene with a textured finish. Seat is two-piece construction. Upholstered chairs have partially exposed polypropylene surfaces. Fabric is upholstered over 9/16" foam on the backrest and 15/16" on the seat.

Backrest Supports

Two die-cast aluminum backrest supports attach the backrest to the Torsion® mechanism. A steel tube is cast into each backrest support for added strength.

Torsion® Mechanism

The back flex is achieved by the Torsion® mechanism. It consists of two flat torsion springs captured at both ends by brass bushings which in turn engage with the backrest supports. The Torsion® mechanism creates gradually increasing resistance over the full

12° of back flex.

Design

Designed by Giancarlo Piretti and manufactured in the USA by Krueger International, Inc. under license from Pro-Cord S.p.A.

Dorsal® Seat

Seat and Back

Two-piece injection-molded thermoplastic seat and backrest with textured seat and backrest surface, on front only. Seat and backrests are joined by a maintenance-free steel hinge with integral spring mechanism. The hinge to be covered with high-strength plastic bellows. Upholstered chairs have fabric covered, extra thick, soft foam backrest and seat cushions fastened to an inner shell. Four molded-in sills on underside of seat attach to spider with hi-lo screws.

Design

Designed and developed by Emilio Ambasz and Giancarlo Piretti for OPENArk B.V.

Manufactured in the USA by Krueger International, Inc. under license from OPENArk B.V. Dorsal® is a registered trademark of OPENArk B.V. and is used under license by Krueger International, Inc.

C.O.M Testing and Production Requirements

Not all materials are suitable for upholstering Torsion® or Dorsal® seats. A 1 yd. x 54" sample must be submitted and approved prior to acceptance of an order. If the fabric is directional in pattern or weave, the direction must be indicated on the submitted sample, and additional yardage may be requested.

Test samples must be sent to:

KI
Attn: C.O.M. Specialist

SPECIFICATIONS

Frames

Duplex nickel chrome plated or powder coated .75 x 1.5" o.d. x 15-gauge elliptical steel tubing.

Seat and Back

Solid, molded, 1/4" thick, ABS plastic attached to frame with screws.

Tops

Solid, molded ABS plastic with comfort curve along back edge, integral pencil grooves on each side. As with any large flat plastic surface, the support structure underneath may cause surface imperfections. Request samples for approval. Choose from solid tops, mold-in Rezilyte, or glue-in high pressure laminate tops. Rezilyte tops have a seamless transition between the decorative pattern and the ABS edges. (Rezilyte not available on Compact Double-Entry desk). Glue-in high-pressure vertical-grade laminate insert is bonded into recessed area on desk top and

has a shallow transition between laminate and the ABS edge. The center section of the Two-Student Table is black molded ABS plastic that separates work areas and provides cable management.

ADA Top

Worksurface construction shall be 3/4". 45# high density particleboard core with 0.030" high pressure laminate top and phenolic backing sheet. Round vinyl T-mold edge. Radius corners with comfort curve along user side.

Glides

End glides shall be "soft" Santoprene to resist skidding and marring. Angled glides prevent tipping and act as a wall saver. Angled glides are made of two components - the glide body and the glide cap. The glide body is made of heavy-duty nylon plastic that fits securely over a plate that is welded to the frame. The standard glide features a warm grey molded bottom. The bottom is molded to the glide body for a secure bond. The glide bottom is also flat making the glides handed - LH & RH. Two

optional glides caps also available are nickel-plated steel and embedded felt.

Chair and Double-Entry Handle

Ergonomically designed handles are located behind seat back on chair or either size double-entry desk. Made of black nylon.

Book Box

Optional solid, molded ABS plastic book box installs by sliding into integral steel track on underside of desk or two-student table (two book boxes can be used with the two-student table). Book box can be used as storage tote when removed from the unit. Stacks up to ten high. Can be used as a computer keyboard tray when in the extended position. Can be fitted with optional mouse tray.

Mouse Tray

Arched piece of solid, molded ABS plastic can be added to optional book box when used as keyboard tray. Slides side-to-side for either left- or right-handed use.

**You make the rules.
We make the rest.®**

Of course KI solutions work better for you. They're made for you. No one pays more attention to customer needs than we do. We don't design our furniture to win awards (even though it does). We don't rely on one-size-fits-all solutions (even though they would make our life easier). We find out what the market needs. And, we make it. The same applies to our service, distribution...everything we do. KI solutions work, because we're working for you.
