Ordering C.O.M., C.O.L., and C.O.V.

How to Specify C.O.M. Upholstery
Textile designs often have intricate patterns. Not all individuals will interpret fabric direction in the same manner.

As a standard procedure, KI cuts fabrics off the roll in a vertical fashion as shown in Diagram A at the fight. By cutting in this fashion, most waste is eliminated. Our requirements for yardage in this book are based on this type of cutting. When directional or patterned fabrics are used, they often require more yardage than solid colors.

By providing KI with a completely filled-out copy of the form on this page, we will be able to expedite your order. We find it particularly helpful with directional or patterned upholstery material. It is critical that copies of this form accompany test quantities as well as production quantities of C.O.M.

C.O.M. must be supplied in continuous yardage.

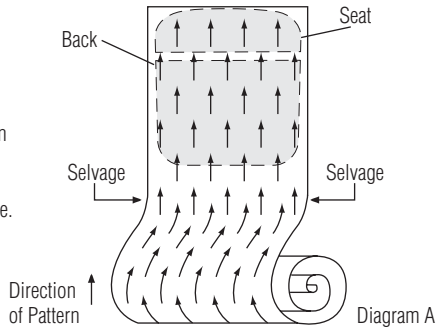

Diagram A

C.O.M. and C.O.V. Testing.
KI will require for testing actual yardage to upholster one chair. The testing requirements depend on which chair you have selected on your order.

Test samples will be applied to the order and will be held for 6 months if needed. After 6 months, the sample can no longer be applied to your order. For all products to be tested, send test samples for approval to:

KI-LA
Attn: C.O.M. Storage
6500 S. Avalon Boulevard
Los Angeles, CA 90003

To expedite the procedure, attach a copy of the "C.O.M. Information Form" on this page.

All C.O.M. and C.O.V. must be labeled with the purchase order number.

C.O.M. and C.O.V. Production
Customer's fabrics must be approved prior to acceptance for production. Upon test approval, a 1' square sample swatch or upholstery material must accompany the order. KI assumes no responsibility for wear, defects or performance of customer's own fabrics or vinyl. C.O.M. and C.O.V. orders are available on a deferred delivery basis.

Orders for production of C.O.M. and C.O.V. upholstered products are not scheduled for processing until upholstery material is received. Upon receipt, KI will provide an acknowledgement and an estimated shipping date.

The C.O.M. and C.O.V. yardage requirements accompanying products in the pricing section are for 10 chairs/seats or less, 54" wide nondirectional material. On larger orders, less material is required.

For exact production yardage requirements, call 1-800-424-2432, ext. 2707.

C.O.M. and C.O.V Order Processing
For products shipped from Los Angeles, CA facility, ship material to:

KI-LA
Attn: C.O.M. Storage
6500 S. Avalon Boulevard
Los Angeles, CA 90003

Intricate Patterns
In the event of specific requirements for positioning of intricate patterns or pattern repeats on seats and backrests, provide a sketch noting requirements, as in Diagram B, along with materials for testing, with the order.

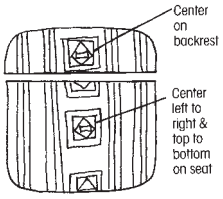

Diagram B

Treated Materials
If C.O.M. requires processing such as Scotchgard® or acrylic backing, it often shrinks. To prevent delays in delivery or back ordering due to shrinkage, please have your processor remeasure after processing and assure adequate yardage shipment.

Split Orders
If a portion of the shipment which does not require C.O.M. or C.O.V. applications is to be processed and shipped early, KI will enter the order immediately at your request. These split shipments are subject to minimum order changes.

Contact the C.O.M. Specialist at 1-800-424-2432, ext. 2707, with questions or to verify a split order.

Excess Upholstery Material
KI will dispose of excess upholstery material at the time of shipment unless expressly requested to return it with the product shipment.

Cancelled or Changes Orders
KI assumes no responsibility for extra C.O.M. or C.O.V. material due to a change of upholstery or cancellation of an order. It is the customer's responsibility to arrange for return of this material.

C.O.M., and C.O.V. Information Form

A copy of this form should accompany test requests and production orders. Please fill it out completely, and, if your order has been acknowledged, provide the acknowledgement number.

SPECIFICATIONS

Seat/Back/Sleep Surface
Seat/back and sleep surface consist of solid high-density, high-resiliency, polyurethane foam layered in increasing firmness from ultra-soft to ultra-firm for soft initial touch and firm orthopedic support. Surfaces are contoured to nest into comfortable, level sleep surface in open (cantilevered) position. Upholstery covers are removable. Upholstery cover membrane is retractable. Fabric selected for cover is laminated on the underside to a launderable, dry-cleanable vinyl barrier as required. Retractable cover hides the crevices between the cushions when pulled over into a sleep position and is permanently pre-tensioned and zipper-removable for cleaning and replacement. The membrane protects the sleep surface from penetration by fluids.

Mounting Deck
Cushions are attached with two wingnuts to a 3/4" edged plywood deck. Deck can be lifted off the frame to access cushion-mounting fasteners on the underside via handles concealed between seat cushions.

Frame
Seat cushion mounting frame made of welded steel that is screw-attached to mounting deck. Frames can be unbolted from below mounting deck so upholstery covers can be removed for cleaning or replacement.

Armcaps
Wood armcaps are constructed of hardwood in four styles and stained in a variety of colors.

Base and Armature
Base constructed of heavy-wall 14-gauge welded steel tubing. Stainless steel telescoped tubes guarantee lasting rotation of internal swivel components.

Coatings/Wood Finishes
Metal finishes are electrostatically applied epoxy powder coating. Wood finishes are catalyzed lacquer over natural wood.

Glides/Wheels
Nylon glides. Optional heavy-duty dual wheels are nylon with lockable front wheels that prevent movement.

Drawers
Two 36" W x 19" D x 6" H steel-sided drawers contain an integral roller glide mechanism and have a 70# load capacity. Internal drawer bottoms faced with 3/4"-thick Melamine. Internal fronts and backs are 3/4" thick. External drawer fronts constructed of high-pressure laminate with smooth, radiused T-mold edges.

Bed Weight Limitations
350 lbs. with 120 lbs. counterweight.

Stability and Support
'Freestanding' model on wheels has solid steel counterbalance bar bolted between rear legs to ensure stability in cantilevered open "sleep" position. Built-in models have a steel frame which is end-supported between objects by others via steel support brackets. Mounting deck for built-in models will be provided by others.
Clearance under steel frame is 9-3/4"

Perth Arm

Features			
One-piece design	•	•	•
Easy opening/closing of bed	•	•	•
Full-size mattress	•	•	•
Mattress contruction Ventex	•	•	•
Three non-marring casters	•	•	•
Spring-assisted mechanism	•	•	•
General Dimensions			
Width	37-3/4”	37-3/4”	37-3/4”
Depth	37-3/4”	37-3/4”	37-3/4”
Sleep position	80”	80”	80”
Sleep surface area	29-1/2”W x 78”L	29-1/2”W x 78”L	29-1/2”W x 78”L

SPECIFICATIONS

Seat Foam
Multi-layered decreasing in density from bottom to top. Bottom foam is a hard density, middle layer is a medium density and top layer is soft density foam. Total thickness of the seat foam is 5” at the front of the chair and tapered at the back.

Back Foam
Medium density, not to exceed 2” in thickness.

Armcaps
Wood armcaps are constructed of hardwood in three styles and stained in a variety of colors.

Casters
Mobility provided by three, non-marking rubber casters. Two casters are positioned in the back corners of the chair. The front caster is retractable and activated through a concealed lever mechanism.

Mechanism
Spring assisted to allow easy opening and closing of the bed. Mechanism construction of tubular and stamped steel. Mechanism is trifold and accommodates a full-length mattress. Mechanism allows for full-time attachment of back and seat cushions for hygienic purposes. Finish is epoxy resin, electrostatically deposited, oven baked, and gray in color. Polypropylene sleep deck.

Mattress
Mattress core is 29-1/2”W x 78”L x 4.375”H and consists of 1.8 lb. density foam with a 33 lb. compression. Mattress is tapered at folding points to facilitate easy opening and closing of the mechanism to allow for sufficient room for bedding accumulation while closed. Mattress cover and sides are constructed of Ventex SOFlux Ox™, a denier oxford nylon with polyurethane coating designed for applications where an anti-microbial fluid-proof cover is required. Mattress bottom is constructed of Ventex SOFGRIP™, a non-skid fabric to hold bedding in place and prevent mattress sliding on platform. A fireproof barrier inner liner is standard.

SPECIFICATIONS

Seat/Back Structural Frame
Constructed of a 1-1/2”W x 1-1/4”thick hot-formed truck-grade, alloy-spring steel. Front-cantilevered from base mounting for rearward deflection. Frame allows the user to lean into well-developed lumbar support without lifting feet off the floor, thereby eliminating under-thigh pressure and compromised circulation. Frame allows for a unified wave-like resilient rocking motion with a flat-bottomed chair base and no moving parts. Frame extends in front of seat at arm height to provide leverage to user when exiting chair.

Armrests
Constructed of tough, non-porous, scrubbable, integrally colored polyethylene. Armrests project forward beyond the seat front for safe and easy egress. Front armrests are supported axially to provide stability during the downward pressure exerted while entering and exiting the chair.

Arm Frame
Constructed of 3/16” x 1-1/2” truck-grade leaf-spring steel that flexes with the structural frame of the seat and back.

Base
Metal base is 14-gauge 1-3/8” diameter round, electric-welded steel tubing assembled with nylok fasteners and all-welded construction. Optional positioner is available on castered and systems base chairs to limit motion by locking the chair into two positions.

Coatings
Metal finishes are electrostatically applied epoxy powder coating. Optional in triple nickel chrome.

Glides
Glides are non-marring unbreakable plastic (surlyn). Front anti-tip glides, on sled base version only, are clear surlyn. Rear glides are natural surlyn.

Wheels
On the sled base, systems base, limiter base and oversize base, non-marring nylon rear tilt wheels are mounted off the floor to engage only when chair is tilted backwards for relocation.

Upholstery Style Description
The Warren™ Chair Series is available in four different upholstery styles. Mesh slings are available in a coordinated series of mesh colors, KI and Pallas fabrics.

00-Style Open Mesh with Fabric or Vinyl Side Trim
The perfect solution where hygiene and cleanability are paramount. The mesh sling specified with vinyl side trim allows for the use of all types of healthcare cleaning agents including bleach and steam. Mesh slings are also CAL 133 compliant.

04-Style Velcro-Removable Padded Upholstery on Back Only with Mesh

Seat
A removable padded upholstery cover for the back of the chair offers the flexibility of having a full upholstered back while retaining the hygienic and cleaning benefits of the mesh seat. The back can be removed for easy cleaning and replacement or to reveal the all-mesh sling underneath.

05-Style Velcro-Removable Padded Upholstery on Seat and Back
Provides the flexibility of having either fully upholstered seat and back covers or, by removing one or both, exposing the fully functional “00” style mesh sling chair underneath. The “05” velcro-affixed covers also allow for easy cleaning and replacement of upholstery covers.

06-Style Permanently Affixed Padded Upholstery, Seat and Back
A wide range of standard and C.O.M. fabric allows for complete customization in a non-removable upholstery style. The value of a padded upholstery, where the cost of velcro-

removability is not necessary.

SPECIFICATIONS

Seat/Back Structural Frame
Constructed of a 1-1/2"W x 1-1/4"thick hot-formed truck-grade, alloy-spring steel. Front-cantilevered from base mounting for rearward deflection. Frame allows the user to lean into well-developed lumbar support without lifting feet off the floor, thereby eliminating under-thigh pressure and compromised circulation. Frame allows for a unified wave-like resilient rocking motion with a flat-bottomed chair base and no moving parts. Frame extends in front of seat at arm height to provide leverage to user when exiting chair.

Bentwood frame constructed from a sculpted 1-1/2" x 2" laminated hardwood base by use of heavy structural metal components that are integrated into the base.

Arms
1-3/8" diameter, 14-gauge steel tubing covered with an integrally colored, resilient dip-molded, non-porous, washable vinyl with grip-textured finish.

Bentwood arms are constructed of laminated hardwood.

Base
Metal base is 14-gauge 1-3/8" diameter round, electric-welded steel tubing.

Coatings/Wood Finishes
Metal finishes are electrostatically-applied epoxy powder coating. Wood finishes are catalyzed lacquer over natural wood.

Glides
Glides are nylon and non-marring. Front anti-tip glides, on sled base version only, are injection molded clear surlyn.

Wheels
Non-marring nylon rear tilt wheels mounted off the floor to engage only when chair is tilted backwards for relocation.

Upholstery Style Description
The Rose™ Chair Series is available in four different upholstery styles. Mesh slings are available in a coordinated series of mesh colors, KI and Pallas fabrics.

00-Style Open Mesh with Fabric or Vinyl Side Trim
The perfect solution where hygiene and cleanability are paramount. The mesh sling specified with vinyl side trim allows for the use of all types of healthcare cleaning agents including bleach and steam. Mesh slings are also CAL 133 compliant.

04-Style Velcro-Removable Padded Upholstery on Back Only with Mesh Seat
A removable padded upholstery cover for the back of the chair offers the flexibility of having a full upholstered back while retaining the hygienic and cleaning benefits of the mesh seat. The back can be removed for easy cleaning and replacement or to reveal the all-mesh sling underneath.

05-Style Velcro-Removable Padded Upholstery on Seat and Back
Provides the flexibility of having either fully upholstered seat and back covers or, by removing one or both, exposing the fully functional "00" style mesh sling chair underneath. The "05" velcro-affixed covers also allow for easy cleaning and replacement of upholstery covers.

06-Style Permanently Affixed Padded Upholstery, Seat and Back
A wide range of standard and C.O.M. fabric allows for complete customization in a non-removable upholstery style. The value of a padded upholstery, where the cost of velcro-removability is not necessary.

SPECIFICATIONS

Seat/Back
Seat and back constructed of one continuous 1” diameter round electric-welded tubing. Mesh is breathable, stain resistant vinyl-coated woven polyester, resistant to growth of bacterial and fungal microorganisms and bleach cleanable. Sling upholstery options include: all-mesh sling chairs with fabric or vinyl side trim. Velcro-removable padded upholstery on seat and back or permanently affixed padded upholstery on seat and back. High-density polyurethane foam.

Base
Metal base is 14-gauge, 1-3/8 diameter round, electric-welded steel tubing assembled with nylok fasteners and all-welded construction. Optional non-marring nylon rear tilt wheels are mounted off the floor to engage only when chair is tilted backwards for relocation.

Coatings
Metal finishes are electrostatically-applied epoxy coatings.

Glides
Glides are non-marring.

Upholstery Style Description
The Companion™ Chair Series is available in four different upholstery styles. Mesh slings are available in a coordinated series of mesh colors, KI and Pallas fabrics.

00-Style Open Mesh with Fabric or Vinyl Side Trim
The perfect solution where hygiene and cleanability are paramount. The mesh sling specified with vinyl side trim allows for the use of all types of healthcare cleaning agents including bleach and steam. Mesh slings are also CAL 133 compliant.

04-Style Velcro-Removable Padded Upholstery on Back Only with Mesh Seat
A removable padded upholstery cover for the back of the chair offers the flexibility of having a fully upholstered back while retaining the hygienic and cleaning benefits of the mesh seat. The back can be removed for easy cleaning and replacement or to reveal the all-mesh sling underneath.

05-Style Velcro-Removable Padded Upholstery on Seat and Back
Provides the flexibility of having either fully upholstered seat and back covers or, by removing one or both, exposing the fully functional “00” style mesh sling chair underneath. The “05” velcro-affixed covers also allow for easy cleaning and replacement of upholstery covers.

06-Style Permanently Affixed Padded Upholstery, Seat and Back
A wide range of standard and C.O.M. fabric allows for complete customization in a non-removable upholstery style. The value of a padded upholstery, where the cost of velcro-removability is not necessary.

Index

You make the rules.
We make the rest.®

Of course KI solutions work better for you. They're made for you. No one pays more attention to customer needs than we do. We don't design our furniture to win awards (even though it does). We don't rely on one-size-fits-all solutions (even though they would make our life easier). We find out what you need. And, we make it. The same applies to our service, distribution channels...everything we do. It's all built around knowing what you want and giving you the choice. KI solutions work, because we're working for you.
